PROFESSIONAL SUMMARY

Computer Science student at Suan Dusit University seeking an internship where I can contribute to data, reporting, automation, and digital process improvement. Hands-on experience preparing and transforming data with Python, SQL, PostgreSQL, Docker, and Apache Airflow, and presenting information through Excel, Power BI, and Tableau. Comfortable learning new tools and turning raw data into structured, reporting-ready datasets.

TECHNICAL SKILLS

Languages & Libraries: Python (Pandas, SQLAlchemy), SQL

Databases: PostgreSQL, SQLite

Data Engineering: ETL pipelines, Medallion Architecture, batch loading, workflow orchestration

Tools: Docker, Docker Compose, Linux, Apache Airflow (DAGs, DockerOperator), Git, GitHub

Reporting & Visualization: Microsoft Excel, Power BI, Tableau (data cleaning and presentation)

Foundational Knowledge: Apache Spark and Hadoop architecture, MongoDB/NoSQL, DuckDB

FEATURED PROJECT

GoogleForm-Medallion-ETL | github.com/BrefGhost/GoogleForm-Medallion-ETL

Python, Pandas, SQLAlchemy, PostgreSQL, Docker Compose, Apache Airflow, Git

- Built a Bronze-Silver-Gold pipeline that transforms raw Google Form survey CSVs into analytics-ready PostgreSQL tables.
- Implemented data processing across layers: preserved raw CSV data in Bronze; standardized text, handled missing values, removed duplicates, and batch-loaded Silver data; aggregated response counts and average satisfaction by faculty in Gold for dashboard and reporting use.
- Containerized and orchestrated the pipeline with Docker Compose, using health checks and service_completed_successfully so all stages run with one command; externalized database configuration through environment variables.
- Created an Apache Airflow DAG (bronze ›› silver ›› gold) with DockerOperator on Airflow 2.10.5 to launch existing ETL images via the host Docker socket; documented fixes for a reproducible Airflow 3.x DAG-loading issue and a Compose volume-override bug.

EDUCATION

B.S. in Computer Science | Suan Dusit University, Bangkok, Thailand

Relevant coursework: Database Management Systems, Data Structures and Algorithms, Software Engineering, Computer Networks, Big Data Fundamentals

ADDITIONAL EXPERIENCE

- Applied a Git feature-branch workflow with separate branches for Docker Compose and Airflow orchestration; maintained a README and detailed commit messages.
